## Mark VI Multi-Rack

The Industry Standard in Drying Racks for 50 years

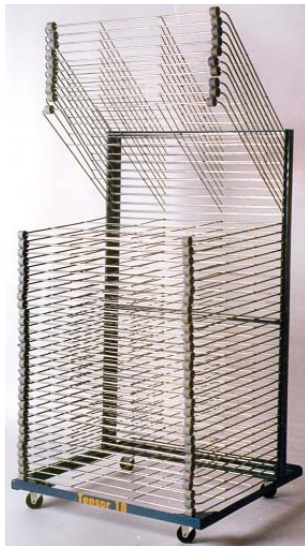

- ◆ **Quality:** The Multi-Rack is built with all steel construction for added strength. Compare gauges, materials and methods and you will find none stronger or better. Intelligent design features push this rack to even higher standards.
- ◆ **Durability:** The Multi-Rack withstands the daily rigors of production year after year. The Multi-Rack will support all your drying and handling needs.
- ◆ **Versatility:** The Multi-Rack can easily be adapted for a wide range of applications. Custom sizes can be made.

### Exclusive Features:

- Tray Extenders:** Increases effective tray capacity.
- Patented Rubber Feet:** Molded parts do not break like welded pieces of pipe.
- Floating Bar:** Improved design ensures even spring tension and ease of assembly.
- Galvanized wire:** Electroplating provides better surface than paint or other coating.
- Oven Package:** Upgrades rack to withstand oven baking temperatures.
- Splicing Kits:** Combine two racks together for increased capacity, big enough for banners.
- Double Spacing:** Increases tray spacing from 1-1/8" to 2-1/4" for thicker objects.
- Customizing:** Multi-Racks can be modified to meet any application.

## Tensor 18

The UPS-able "Heavyweight"

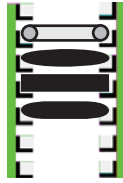

The Tensor 18 Drying Rack is the choice for budget minded printers who demand the highest value and quality. The Tensor 18 is available in a single sided; 40 tray version as well as the Double Sided Tensor 18 with 80 trays.

## Rollin' SCREEN RACKER

Screen Drying/Storage Rack  
For improved efficiency and organization

The **Rollin' SCREEN RACKER** is a safe place for drying and storing screens with the convenience of mobility. It features adjustable width, easily accommodating all screen frames. The deep shelves can support any length screen.

- ◆ Safe Drying and Storage
- ◆ Organization
- ◆ Efficiency
- ◆ Adjustable Width

## RACKER DRYING CLOSET

For increased productivity

The Racker Drying Closet is the efficient method for drying screens in a safe and effective environment. The Closet easily accommodates a Rollin' Screen Racker with screens.

High CFM volume fans pull outside air through a filter and across a heater. The heater warms the air (up to 105°F), directs it down the open side chamber and then through strategically placed holes across the screens, for fast drying.

## THE COVER

Protect coated screens from light and dust

Cover shown open/closed
