

# Rollin' SCREEN RACKER

## Screen Drying/Storage Rack

For improved efficiency and organization

**Saturn  
Rack  
Company**

The Rollin' SCREEN RACKER provides a safe place for drying and storing screens with the convenience of mobility. It features adjustable width, easily accommodating all screen frames. The deep shelves can support any length screen.

Costs are reduced with the Rollin' SCREEN RACKER because a quantity of screens can be processed in one area, then easily moved to another area for drying. Screens can be in multiple stages of processing, including storage, on different Rackers.

Production is better organized when screens are stored in a mobile rack. Jobs can be staged on a Racker and held safely until needed on the

◆ Accommodates all frames

◆ Increase productivity

Heavy duty PVC angle (shelves) are capable of supporting heavy loads. All chance for scratching has been eliminated.

## SYSTEMS

Rackers and accessories expand versatility and productivity

Improved organization will increase productivity. This will increase overall quality resulting in higher profits. To have a place for everything with everything in its place is central to a total quality program. The Rollin' SCREEN RACKER brings a high level of organization to every screen printing shop.

The Rollin' SCREEN RACKER accommodates larger screens by connecting Rackers together, front to back. This sturdy system will easily handle the largest screen frames.

Wider screen frames are easily accommodated with longer adjustment arms. See the specification chart or special order.

The Racker can be customized for any application.

The width of the Rollin' SCREEN RACKER can be adjusted to any dimension with the exclusive "Clamp and Bar"

# Rollin' Job KART

Improves shop efficiency and organization by consolidating all tools of each job

The Rollin' Job KART provides a place for everything necessary for a particular job. You can organize all the screens, ink, squeegees, spray tack, wipes, etc. in one convenient place. This will help organize your shop and keep it cleaner and more productive.

The Rollin' Job KART features adjustable width, easily accommodating screens of varying widths. The 31" deep shelf can support any length screen. The work top easily accommodates all the sup-

# RACKER DRYING CLOSET

Screen Drying Cabinets for increased productivity

The RACKER DRYING CLOSET provides an efficient method for drying a quantity of screens in a safe and effective manner. Closet easily accommodates a Rollin' SCREEN RACKER with screens. With the door closed, screens are protected from light and dust.

A high volume fans pulls outside air through a filter and across a heaterslightly warming the air (up to 105oF) then pushes it down the side chamber where plenums even distribute the air and then through strategically placed holes across the screens for fast drying.

- ◆ Faster Screen Drying
- ◆ Increased Turnaround

For additional informatin please see our web site or request a brochure.

# THE COVER

Protect coated screens from light and dust

The COVER protects five sides from light and dust. Two zip-pers open one side allowing access to the screens. This accommodates screens ready for exposure.
